Introduction

This single port 10/100/1000M PoE splitter is independent research and development for high power PoE splitter, it supports LT PoE standard, and can be backward compatible with IEEE 802.3at PoE standard. The maximum output power is 25.5W. This high power PoE splitter can provide the maximum output power must be matched with high power PoE switch or power injector, the output power will be less than the requested power if matched with IEEE802.3at standard PoE switch.

PoE splitter can provide a simple and economical solution for high performance Ethernet PoE power supply and data communication. Easy to use and install, superior performance and cost-effective, which is an ideal choice for customer to improve the projects' quality. It's an efficient engineering solution to meet the requirement of the reliability system and simplified installation for remote places without power supply or unable to use Ethernet cable to supply power.
